

MILWAUKEE COUNTY

SAFETY NET CLINIC

2015 Referral Directory

MILWAUKEE HEALTH CARE

PARTNERSHIP

IN COLLABORATION WITH

**Free and Community Clinic
Collaborative**

WITH FUNDING SUPPORT FROM

**United Way of Greater Milwaukee
& Waukesha County**

PREPARED BY

IMPACT Planning Council

Acknowledgements

On the occasion of the fifth update of the Safety Net Referral Directory we would like to acknowledge the guidance and leadership of Joy Tapper, Milwaukee Health Care Partnership and Dr. Barbara Horner-Ibler of Bread of Healing Clinics and the Free and Community Clinic Collaborative.

The Safety Net Referral Directory is a reflection of the efforts of the hundreds of people who work in clinics across Milwaukee County. These health professionals, students and volunteers provide health care services to thousands of Milwaukeeans.

This Referral Directory was made possible through support from United Way of Greater Milwaukee & Waukesha County.

Linsey Sieger of Third Sector Creative designed this Referral Directory, contributing greatly to its utility. Thanks are also extended to Terry Johnson who ably prepared the maps identifying the location of each clinic.

IMPACT Planning Council uses a team approach to conducting community research and evaluation. Staff who contributed to this project include Julie Whelan Capell, Dr. Kathleen Pritchard and Dr. Virginia Carlson. Special thanks to Teresa Schiltz and Nicole Kramer, IMPACT interns who assisted with careful data entry. Carrie Koss Vallejo conducted interviews with clinics and managed the project.

MILWAUKEE HEALTH CARE PARTNERSHIP

November, 2015

The *Safety-Net Clinic Referral Directory* is a comprehensive inventory of the free and community health clinics in Milwaukee County that serve uninsured and underinsured patients.

In collaboration with the Milwaukee Free Community Clinic Collaborative (FC3) and with support from United Way of Greater Milwaukee & Waukesha County, the Milwaukee Health Care Partnership worked with IMPACT Planning Council to collect this information on safety net clinic resources.

The 2015 inventory builds on the initial directories published in 2009 and updated in 2011, 2013 and 2014. The information collected is being released in two formats:

1. *The Safety-Net Clinic Referral Directory* can be used by health care providers, care managers and others working in helping professions to identify health care resources for underserved populations. The data is also made available to IMPACT 2-1-1, which serves as the complete information and referral source for Milwaukee County health and human services.
2. *The Safety-Net Clinic Planning Resource* can be used by community leaders, planners and funders to inform community health improvement strategy and investments.

Both the referral directory and the planning resource are available online at www.mkehcp.org and www.impactinc.org. Given the ever-changing health care environment, we recognize that the scope of services available through these clinics frequently changes. Therefore, we encourage users to routinely validate referral information directly with community clinic partners prior to making a referral and to rely on IMPACT 2-1-1 for the most up-to-date information about community health resources. To search this directory online, go to impactinc.org and look under “search for Community Resources” or simply dial 2-1-1.

Joy Tapper, Executive Director
Milwaukee Health Care Partnership

Note on Information in this Directory

Information in this Referral Directory was provided by staff and volunteers at the clinics included. The most current information can be found at IMPACT's online resource at impactinc.org, by calling 2-1-1 or calling a clinic directly.

After sharing information for this Referral Directory, clinic staff were given multiple opportunities to verify that information was entered correctly. If a clinic did not verify the information in time for print, it is noted at the bottom of the page.

Deliberate efforts were made to reduce errors or omissions, but if data errors are found in this directory, please report them to info@impactinc.org

Medical Clinic Designation:

FC3 indicates a clinic that is part of the Milwaukee Free Community Clinic Collaborative.

FQHC indicates a clinic that is a Federally Qualified Health Center.

For the most up-to date information on any clinic in this guide, please visit the IMPACT 2-1-1 Online Resources Directory at impactinc.org or call 2-1-1.

General Description of Services

The Angel of Hope Clinic provides a full range of primary care services. The clinic provides health care for neighbors who have limited access to services, as well as residents at Hope House - a homeless shelter. Services include: routine health assessments, immunizations, well-child checkups-care, screenings for infectious diseases such as TB, HIV, Hepatitis, as well as screening for environmental hazards such as lead poisoning, etc. In addition to medical evaluation and treatment, patient education regarding health maintenance and promotion, sick child care and STD's are key elements of this service.

General Description of Services

The clinic is a point-of-entry clinic for new patients and is not meant to be a long-term medical home. Well-suited to provide urgent care or care to those who find themselves newly without access to a community health center. Walker's Point Community Clinic is an urgent care medical clinic, serving the uninsured, homeless and those that face barriers such as language, immigration status and mental or physical illness. The clinic does not prescribe narcotics. This is an excellent site to access Well Woman/Wise Woman services (cancer and cardiovascular screening for women).

As of October 22, 2015, this clinic had not verified the information they provided.

Information is accurate as of November 2015. For the most up-to-date information, please visit the IMPACT 2-1-1 Online Resource Directory at impactinc.org or dial 2-1-1.

General Description of Services

The clinic is a collaboration of Columbia St Mary's Hospital and the Medical College of Wisconsin, which screens and manages hypertension, diabetes, obesity and smoking. The clinic addresses barriers to health services for low-income adults who are at risk of developing chronic diseases. By establishing clinics in nontraditional locations, such as food pantries, and offering screening, referral and management services; low-cost drugs; at-cost diabetic supplies; and preventative education, CCDM clinic contributes to the prevention of chronic disease complications among Milwaukee's most vulnerable populations.

As of October 22, 2015, this clinic had not verified the information they provided.

Information is accurate as of November 2015. For the most up-to-date information, please visit the IMPACT 2-1-1 Online Resource Directory at impactinc.org or dial 2-1-1.

General Description of Services

CORE/EI Centro, located on the near Southside of Milwaukee, is a social-profit, bilingual, natural healing center which embraces all people and has a passion for serving those of low income. The agency's purpose is to make healing services accessible; including massage, acupuncture and energy work, to build community, and to inspire to wholeness all who desire the healing capacities of natural therapies. As a non-profit, CORE/EI Centro is dedicated to accomplishing this by offering natural healing practices and holistic exercises that integrate body, mind and spirit and by creating an environment that nurtures self-healing and community well-being.

Information is accurate as of November 2015. For the most up-to-date information, please visit the IMPACT 2-1-1 Online Resource Directory at impactinc.org or dial 2-1-1.

General Description of Services

Teen-Tot Clinic is the only clinic in Milwaukee specifically for adolescent parents and their children. The teen mom and her baby are seen at the same time by the same health care provider. Clinic services include: immunizations; well-baby care; prescribing and monitoring birth control methods; and treatment and prevention of sexually transmitted diseases (STDs). Fathers are encouraged to attend appointments with the mother and baby. The Teen-Tot Clinic also provides education in positive parenting skills, mental health care & help with housing and getting back in school. The general pediatrics clinic provides the full range of services (well child care, acute care, follow-up care) in a medical home environment for patients up through 18 years of age and up to 21 years of age for teen mothers.

- Must be employed and uninsured
- Proof of income required, must be at or below 200% Federal Poverty Limit
- Referrals accepted
- Will assist with insurance enrollment

Payment Practices: Free to all users, donations accepted

General Description of Services

The clinic provides primary medical care to low-income, working, uninsured patients who seek diagnosis and treatment of episodic illness. GMFC does not treat or duplicate services which are available through other agencies. Patients will be referred out when appropriate. The clinic provides medication (when available) for the illness: medication for chronic conditions may be provided in certain circumstances on a temporary basis. Physicians who staff the GMFC are volunteers from the community. There is limited support to provide lab work and x-rays and the clinic reserves ordering these for difficult to diagnose cases.

General Description of Services

The mission of the OCHC clinics is to ensure that men, women and children in the Greater Milwaukee Area receive the quality health care, behavioral health, housing and supportive services they need to live at the highest possible level of self-sufficiency. OCHC will work to achieve this mission through advocacy, outreach, prevention, public awareness, collaborative relationships with other services providers and contracting for or providing a quality, cost-effective continuum of care. OCHC has relationships with St. Ben's Clinic, Walker's Point Community Clinic and Salvation Army Clinic.

The Human Services Department at the United Community Center provides bilingual and culturally competent programs for Hispanics and other minorities with alcohol and other drug abuse problems. AODA Treatment services are available at multiple service levels depending on need: residential treatment, day treatment, outpatient treatment. The department also offers a variety of targeted mental health services, including individual, couples and family therapy, and parenting services including filial therapy for fathers and mothers. All treatment services provided are available for men and women.

Information is accurate as of November 2015. For the most up-to-date information, please visit the IMPACT 2-1-1 Online Resource Directory at impactinc.org or dial 2-1-1.
